Keomony Pagoda, Sangkat Prek Khampeus, Dangkor District Phnom Penh City

EDUCATION

- **Royal University of Phnom Penh**
  Master of Information Technology Engineering
  Start on March 2025
- **Royal University of Phnom Penh**
  Bachelor of Information Technology Engineering
  Certificate Completed in 2023
- **Hun Sen Phdau Chum High School**
  Certificate completed in 2014

SKILL

- Advance Cross-platform mobile apps
- Understanding development language, front-end, backend
- Backend API integration, SQL, PostgreSQL, SQLite
- Payment gateway integration, mobile security principles, including biometric authentication, secure data storage, and encryption
- Third-party services (Firebase, OneSignal, etc.)
- CI/CD pipelines, Git, and DevOps practices
- State management expertise
- Testing, debugging, and code quality
- UI/UX design fundamentals
- Agile workflow, team coordination, coordinate project, Jira, Figma
- BRD and BCD documentation

LANGUAGE

- **KHMER :** Native
- **ENGLISH :** Good

PROFILE

As Mobile Developer with many years of experience architecting production-grade native and cross-platform applications in fintech, public health, and enterprise sectors. Currently at Wing Bank, I specialize in developing high-performance Flutter applications with secure authentication and real-time banking integrations. With a proven track record of publishing many apps, I combine technical expertise in state management and API integration with strategic skills in project coordination and BRD documentation. I am currently advancing my leadership capabilities by pursuing a Master of Information Technology Engineering.

WORK EXPERIENCE

Mobile App - Camemis Solution

December 2021- September 2023

- designing and building new features for Android/iOS applications, cross-platform (Flutter) mobile apps with new features, custom widgets, animations, and Firebase integrations.
- tests to identify malfunctions, fix bugs, and optimize application performance, speed, and battery usage.
- Support the integration of backend services and RESTful APIs.
- Manage full release lifecycle: updates, deployment, and publishing to App Store and Google Play.
- Work with cross-functional teams, including UI/UX designers, PMs, and senior developers.
- Follow coding standards and learn industry best practices.
- **Key Projects:** Camemis Guardian, Camemis Teacher, Taxi Delivery System

Flutter Developer - Codingate Technology

October 2023 - February 2024

- Design, build, and maintain high-performance, reusable, and reliable Flutter code for iOS and Android.
- Integrate third-party services and RESTful APIs.
- Work with design teams to implement pixel-perfect, responsive UI designs.
- Troubleshoot, debug, and optimize application performance. Work with cross-functional teams (Product, Backend, QA)
- Managed app updates, deployments to both release stores, and provided support for project management activities.
- Mentored interns and new team members, ensuring adherence to best coding practices through guidance and code reviews.
- Realtime project, WebSocket, push notifications, chat module
- **Key Projects**: KMK Vendor, KMK Driver, HongKong Shop App,

Project Coordinator - Codingate Technology

March 2024 - November 2024

- Coordinated project schedules, meetings, and documentation including reports, contracts, and progress records.
- Served as communication bridge between teams, stakeholders, clients, and external advisors to ensure alignment on goals and timelines.
- Tracked project progress, provided status updates, and proposed adjustments to keep initiatives on target.
- Supported resource allocation, procurement activities, and requirement gathering through direct client engagement.
- Collaborated with on-site and field teams to ensure smooth project execution and timely delivery.

Software Developer - National Institute of Public Health

November 2024 - August 2025

- Designed and developed cross-platform mobile applications using Flutter and React Native to support public health operations and HRMS workflows.
- Built advanced system features and integrated secure Laravel-based APIs to enable reliable health data exchange across departments.
- Published applications on both iOS and Android platforms, ensuring compliance with store policies and public health standards.
- Performed thorough QA testing, optimized performance for high-reliability environments, and demo training to multiple NIPH departments for effective system adoption.
- **Key Projects:** NIPH HRMS, Social accountability Mobile App, NCA VHSG, RCI Mobile App (V2)

Application Support Officer - Wing Bank

August 2025 - Nov 2025

- Provide front-line support, resolve user issues, and manage escalations for critical cases.
- Perform root cause analysis and implement long-term fixes to prevent recurring incidents.
- Liaise between users, stakeholders, and IT teams on system changes and issue resolution.
- Collaborate with development, QA, and infrastructure teams to ensure application stability.
- Coordinate with third-party vendors and ensure SLA compliance.
- Track and facilitate issue resolution between development and end users.
- Gather and analyze data to support BRD and BCD documentation for business analysts.

Mobile Front End Developer - Wing Bank

Nov 2025 - Present

- Develop high-performance including API integration and effective state management.
- Ensure code quality through unit testing, rigorous code reviews, and adherence to best development practices.
- Analyze crash reports, monitor production stability, and perform root cause analysis to implement long-term fixes.
- Collaborate closely with UI/UX designers, backend developers, QA teams, and product owners to deliver user-centered and well-integrated solutions.
- Manage and mentor junior developers and interns, while managing timelines, resources, and deliverables to ensure high-quality releases.
- Manage the full mobile release lifecycle, including version control, App Store and Play Store deployments, and researching emerging technologies to improve scalability, maintainability, and user experience.
- Applying mobile security principles such as biometric authentication, secure data storage, cryptography RSA, AES and Hashing for data protection, and encryption, and exploring emerging technologies to improve scalability and maintainability.

KINGDOM OF CAMBODIA
Nation - Religion - King

Royal University of Phnom Penh
N°: 1398 / 2023 RUPP

CERTIFICATE OF COMPLETION

This is to certify that:

Name	:	**HUY BANHA**
Sex	:	Male
Nationality	:	Cambodian
Date of Birth	:	03 October, 2001
Place of Birth	:	Kampong Cham Province, Cambodia

has satisfied all the requirements of the university for the **Bachelor of Engineering** in **Information Technology Engineering**

Examination Date : 10 July 2023

This certificate is issued to the bearer for any use deemed applicable.

* **Note:** This certificate is issued once only.

Phnom Penh, 25 August, 2023
For Rector

Mr. Phal Des
Vice-Rector
